Deep Orange Red

BREEDER'S INFORMATION

DP18001 - Susan 17 is an outstanding orange that produces constantly these huge umbels.

Five roses is a well known orange and these two should produce some quality plants.

DP18002 - The objective is to maintain bronze colour of Gunston but get more open recurve flowers.

DP18003 - Both these plants are first flowers with good qualities. Hopefully the pollen parent will help to bring a thinner edge to the flowers in the off spring.

DP18004 - To breed better Hirao plants with more recurve flowers.

DP18005 - Both of these bronzes have this pinkish under tone. The first objective was to breed quality bronzes with good flower shape and high flower count. Increased pink colour will be the ultimate.

DP18006 - These two above average Belgian Bronzes should give good results. The berry parent does split for Hirao.

DP18007 - My objective with this cross is to get recurve bicolours. Recurve picotees will be a bonus.

DP1008 - Hope for some good reds.
