BREEDER'S INFORMATION

Seed list 2 of 2018

In this seed list we offer crosses made with Cemeo as pollen parent. The breeding record of Cemeo is seen in many outstanding plants been bred over the last years. I would like to give credit to Liz Boyed, who I bought my offset from, for the right to use her photo.

DP18009 - Touch of class is a clivia true to its name. Breeding for form quality.

DP18010 - Breeding for flower count.

DP18011 - The berry parent is one of the best bronzes in my collection, ex Willie du Plessis.

DP18012 - Dooley is a green throat peach and good yellows/peaches can come from this cross.

DP18013 - I am very excited about this cross between two well known plants.

DP18014 - The berry parent is an Australian Kevin Walters Light Orange and Bill Morris Yellow cross.

DP18015 - Combining flower count and quality flower shape.

DP18016 - The berry parent is a lovely Yellow ex Felicity Weeden. Expect yellows too.

DP18017 - Hope to breed some soft colours with green throats.

DP18018 - The berry parent is a Light Orange with nice round umbel and high flower count.

DP10119 - The berry parent is a lovely pastel, Powder Buff x Self.
